SKILLS

LANGUAGES

Java, JavaScript, HTML, CSS, SQL

FRAMEWORKS

Spring Boot, React, Tailwind CSS

DATABASES

PostgreSQL, H2

TOOLS

Git, GitHub, Maven, Docker, Postman, Jira

TESTING

JUnit

DEPLOYMENT

Railway

EDUCATION

Zip Code Wilmington

Coding Boot Camp, Certificate of Completion

Wilmington, DE / 2023

Bucks County Community College

Associate of Arts, Communications Studies
Newtown, PA / Sept 2019 to May 2021

CERTIFICATION

Software Engineering Lite

JPMorgan Chase & Co. via Forage
December 2023

Completed an engineering ticket for the credit card rewards system.

Wrote a new class and test suite to get an existing system running.

SUMMARY

Full-stack developer with a background in communications and a love for art. I got into tech because I like building things, the kind of small, useful tools I'd actually want to use myself. Right now I'm working on a calendar app, front to back, just to see how it all fits together. I'm still learning, and honestly that's the part I like most.

EXPERIENCE

Software Development Intern

Zip Code Wilmington, Wilmington, DE

March 2026 to Present

Currently participating in an immersive internship focused on hands-on full-stack development.

Human Resources Specialist

Achilles Care, LLC, Hatboro, PA

November 2023 to March 2024

Oversaw recruitment and training processes, improving integration and care standards for pediatric and other clients.

Managed client and caregiver relations, handled conflicts, and liaised with insurance firms to secure coverage for services.

Supervised scheduling and ensured regulatory compliance in documentation, maintaining operational and legal standards.

Software Developer Student

Zip Code Wilmington, Wilmington, DE

February 2023 to May 2023

Admitted into a competitive full-stack Java program that accepts less than 12% of applicants.

Completed over 1000 hours of hands-on projects using Agile, Scrum, TDD, and object-oriented programming.

Assembler

Dutch Ophthalmic Research Center (D.O.R.C.), Doylestown, PA

June 2021 to December 2022

Assembled fragile, specialty ophthalmic laser equipment for over a year with zero errors.

Solely responsible for quality assurance, inventory tracking, and order management for medical products.

PROJECTS

Bloom, Calendar App

Full-Stack Personal Project

frontend github.com/AnastasiaE3/my-calendar-app

backend github.com/AnastasiaE3/bloom-backend

Full-stack personal calendar with four views (Year, Month, Week, Day) for managing events, notes, and lists.

React, Tailwind CSS, and React Router on the frontend; Java 21, Spring Boot, and PostgreSQL on the backend, deployed live on Railway.

Single-user app with shared data across PC and mobile, styled with a custom peach and coral color palette.

CRUD Demo

Spring Boot Application

repo github.com/AnastasiaE3/FirstCrudApp

Spring Boot app with CRUD operations on an H2 in-memory database, using Spring Data JPA, Spring Web, and Maven.

Containerized with Docker and deployed on Render.com via an automated script.
